

Final Assessment Task

Negotiating the price of items at the market

For this final task, you will video-record yourself asking for and negotiating the price of five market items with a classmate, friend, or a family or community member. You will be simulating a real-world marketplace exchange. We will practice this task together in class, but you will record yourself doing a final version (a task repetition) outside of class. This is the video you will submit as your final assessment for this unit.

To guide you, you can use the design of Task 4 that we did in class as a guide:

1. First, find five things that you will try to buy (these can be any items that you want).
2. Find your video partner, and explain to them that they will simulate being a ‘vendor.’
3. Record yourself asking your partner for the price of all five things.

Try to negotiate at least *one* item.

See what your partner says!

4. At the end of the video, show and share all of the items that you will purchase, repeating each item’s price, and say the total that you will be spending. (All in Spanish)

You must upload your video to your final learning E-Portfolio.

Assessment rubric for this target task:

Criterion	Check off if completed
1. Student turned in video of themselves simulating a conversation with a vendor at a marketplace.	<input type="checkbox"/>
2. Student did not read during the video.	<input type="checkbox"/>
3. Student’s simulated conversation was natural and spontaneous.	<input type="checkbox"/>
4. Student greeted the vendor.	<input type="checkbox"/>
5. Student asked for the price of five items.	<input type="checkbox"/>
6. Student negotiated at least the price of <i>one</i> of the items.	<input type="checkbox"/>
7. At the end of the video, student repeated each item’s price.	<input type="checkbox"/>
8. At the end of the video, student said the total spent.	<input type="checkbox"/>
9. Student’s grammar and vocabulary were mostly accurate during the task.	<input type="checkbox"/>
10. Student’s pronunciation was mostly target-like during the video.	<input type="checkbox"/>

Total score: _____ / _____ 10 = _____ %
