Task 4: Situations while traveling

Below are some real-world situations that you may encounter when traveling abroad. For this task, you and your classmate are to think of responses to say to each situation. Please *write* what you would say in each situation in Spanish complete sentences (or questions). Since you will be interacting with people and professional workers whom you do not know, it is best to be on the more formal side when interacting.

You can refer to your vocabulary handouts, consult dictionaries online, ask your teacher for help, and/or any other recourses that you need. Be creative! (Think about what you would really say and do in each situation). Be prepared to share written answers with the entire class when you are finished.
