

## Giving directions to an uber driver

Task: You and your partner have ordered uber eats and the driver is trying to get to your location. However, they are a little lost and need directions to get to you.

Look at the map of FMU below. Select a numbered building location for where ya'll are at, and mark it with an X. The driver has entered through the main entrance of campus. Your task is to work with your partner and write directions for the uber driver to get to where your X is. Ask your teacher if you need any help. You will have ten minutes to complete the task. Be prepared to read out your final directions in front of the class when you finish.
